## About Us

The BMSC Debating Club (BDC) started its journey on February 20, 2023. With the purpose of allowing students to participate in debate with a view to developing speech and communication skills, including persuasion, organization, style, and delivery.

This organization would provide a forum for the civil and constructive discussion of pressing issues while allowing its members to interact with fellow students, promoting activism in the school community. The improvement of individual communication skills at all levels of ability and the beneficial addition to the image of a member's academic resume are also notable causes for the purpose of this organization. The main purpose of this club is to sow the seed of debate at BIAM Model School and College. We want to increase the number of quality debaters at BIAM Model School and College so that they can represent the institution.

C. M. Isfar Jamee, along with Nafisa Annan and their team, are working hard to prepare and produce debaters from the interested members. By June 1, 2023, they will have already taken five workshops to improve their debating skills.

C. M. Isfar Jamee and Nafisa Annan already represented BIAM Model School and College at the 15th National Debate Carnival arranged by the National Debate Federation (NDF). They have already prepared a team that will represent BIAM Model School and College at the Prothom Alo National School Debate Program. They are also preparing teams for some other national debate festivals. They will send more than eight teams to the Notre Dame Debate Carnival—the largest debate carnival in Bangladesh. Last but not least, the BMSC debate club focuses on creating a prominent debate background at BIAM Model School and College. We strongly believe that if the BMSC Debate Club-BDC can continue their work accordingly, then it is only a matter of time before we see debaters from BIAM Model School and College get the chance to participate in each and every national debate program and also earn recognition for the institution.
